

2022 Construction Project Areas

Cape Jellison Road in Stockton Springs – Beginning at the intersection near the Stockton Springs Town Garage heading easterly for approximately 2,840 feet.

Black Road South in Searsport – Beginning at the intersection of Black Road South and Union Street heading northerly for approximately 1,000 feet.

Steamboat Avenue in Searsport – Beginning at the intersection of Route 1 heading southerly for approximately 1,200 feet to the intersection of Cross Street.

Water Street in Searsport – Beginning at the intersection of Route 1 heading southerly for approximately 1,000 feet.

Navy Street in Searsport – Beginning at the intersection of Route 1 heading generally southerly for approximately 1,800 feet to the intersection of Trundy Road.

Elm Street in Searsport – Beginning at the intersection of Route 1 heading southerly for 500 feet to the end of Elm Street.

Park Street in Searsport – Beginning at the intersection of Elm Street heading westerly to the intersection of Leach Street for approximately 250 feet.

Leach Street in Searsport – Beginning at the intersection of Route 1 heading generally southerly for approximately 900 feet to the intersection of Howard Street.

All streets will be replaced with new 8” ductile iron water main. New ductile iron water main has a cement lining which significantly reduces internal erosion and increases the longevity of the water main as compared to the old cast iron water main it will be replacing.
